## GOLD AND SILVER IN ABUNDANCE

Eureka Operator Is Loud in Praise of Bullfrog Region.

TAP ONTARIO WATER TODAY

NOVEL PLAN OF DRAINING MINE

AND CAVED TUNNEL.

Frank Kimball, the well known Eureka mining man and banker, who went into the Bullfrog country with D. H. Peery, C. E. Loose, William Hatfield and the rest of the crowd which left here a week ago Sünday, returned by way of Las Vegas and the San Pedro yesterday morning.

"None of the party returned with me," said Mr. Kimball during the afternoon. "Messrs, Peery, Mead and others remained at camp, while Messrs. Loose and Hatfield left Beatty for Bodie, Cal., just as I pulied out on the stage for Las Vegas. Was I pleased with the trip? Well, I should say so. I would not have missed it for anything. All the way from Tonopah clear down through to the San Pedro is a continual string of camps; every one of which, apparently, is determined to outshine its rivals. Everybody is on the Jump, and business is done so rapidly that there is little chance for the laggard.

In the Sac and closed on limited offerings at Soc, shot up to 864c, and closed on limited offerings at Soc, shot up to 864c, and closed on limited offerings at Soc, shot up to 864c, and closed on limited offerings at Soc, shot up to 864c, and closed on limited offerings at Soc, shot up to 864c, and closed on limited offerings at Soc, shot up to 864c, and closed on limited offerings at Soc, shot up to 864c, and closed on limited offerings at Soc, shot up to 864c, and closed on limited offerings at Soc, shot up to 864c, and closed on limited offerings at Soc, shot up to 864c, and closed on limited offerings at Soc, shot up to 864c, and closed on limited offerings at Soc, and closed in the mery of the bears and from an opening at Soc, the mand closed in the mery of the bears and from an opening right that there is little chance for the

"The Montgomery mountain properties are certain to make a great commotion in the mining world. The wonderful strike in the Shoshone group is all that it has been pictured. No one can yet tell how big it is going to prove to be. The ledge has been gone into for more than sixty feet and ore is everywhere. From the samples taken out of the mine, from the assays exhibited and from the statements of the men in charge of the mine, it seems to me that all this mass of ore ought easily to average \$1,000 per ton gold and silver. A great deal of it runs into such large figures that one is inclined to doubt them until he sees the amount of gold that can be washed out of some of gold that can be washed out of some of the rock. After witnessing some of these remarkable pannings, a person is not inclined to stop and consider whether there is any silver in the ore or not; but, as a matter of fact, the ore is extremely rich when counted for the silver values along.

fruitful of big results as in the neighboring bonanza.

'On the other end of the Peery ground is the Bank Note company's territory, which is also producing lots of rich ore, while in the same vicinity is the Denver and several other producing properties of more than ordinary merit. I did not begin to see all that I should have liked to, but my time was limited and I had to make the best of it. To make the trip from here to was limited and I had to make the best of it. To make the trip from here to Tonopah, then to Goldfield, on to Beatty and Rhyofite and through to the San Pedro at Las Vegas in a few hours over a week keeps one on the move, I can tell, but the trip is worth the trouble and I should like to make it over again with about a month's time at my disposal."

Forenoon Sales.

Lower Mammoth, 500@29c; 3.500@30c; 500 it is the line is bringing down all the ore required by the mill and several 100-ton lots of first-class copper ore besides. At the same time considerable up freight is being handled and Mr. Crowther is perfectly satisfied with the way things are moving, everything considered.

## DRAINING THE ONTARIO.

#### Pent-Up Waters Will Be Tapped in Novel Manner Today.

the Ontario mine will begin today through the drift that has been pushed around the cave in the great drain tunnel 1,600 feet from its mouth. It was not known at the company's office yesnot known at the company's once yes terday that the waters had been tapped through the new channel, but the pre-sumption was that everything would be

In readiness for the move by today.

The scheme of drawing off the water which has been held back under trewhich has been held back under tremendous pressure since the mine began to fill up several weeks ago, was planned by competent engineers and approved by Manager C. L. Rood soon after the work of getting around the cave was undertaken. The details of the plan have been carefully withheld from the public.

from the public.

The plan which has been carried out and which is to be put to the test today is unique in mine engineering. At a point thirty-five feet from the main tunnel, the paralleling of that avenue on the north side of the cave was commenced. After running between eighty and ninety feet, the drift was turned at a easy angle toward the main tunat a easy angle toward the main tunnel again. All of the work has been done in solid rock and that fact makes its successful termination all the more certain. It was known that should the tunnel be tapped by a blast the force certain. It was known that should the tunnel be tapped by a blast the force of the rushing waters would carry everything before it and completely wreck the tunnel, even if it did not result in the loss of life. To guard against any such catastrophe, it was decided that after the rock had been cut through to a safe point approaching the tunnel, a heavy bulkhead should be constructed—one that would be as strong as the rocks in which it should be built—just back of the rock face dividing the main tunnel from the encircling drift.

This bulkhead, the word from camp says, is supported by solid iron or steel pillars and built of solid concrete or cement. Inserted in this bulkhead are a number of pipes or tubes, fitted with special valves and made a part of the story, has its own water-tight compartment between the bulkhead and the rock face of the drift, or the former has been placed so close to the face that no great amount of water could get in between. On this point The Herald's informant was not sure.

With everything in readiness, it is the purpose to operate a diamond drill through one of the tubes until the main tunnel is tapped, withdraw the drill and close the valve. This process is to be repeated until all of the necessary connections have been made and then the different valves will be opened and the water released in such a way as to drain the mine and save the tunnel at

water released in such a way as to drain the mine and save the tunnel at the same time. It is understood that the valves can all be electrically con-trolled from the mouth of the tunnel.

## DALY-WEST'S 'EARNINGS.

## Report Made in Boston Shows Febru-

The week opened on 'change with the market, barring May Day, unusually strong and buoyant. During the day a total of 53,700 shares of stock, with a selling value of \$11.839.75, changed hands. Lower Mammoth and New York Bonanza setting-the pace as regarded advance in prices.

### CONTINENTAL-ALTA AFFAIRS.

### Second Shift to Go on at Mill-Tramway Doing Well.

After two weeks almost incessantly at camp. Manager Henry M. Crowther of the Continental-Alta was at his desk again yesterday. Getting a five-mile tramway and a milling plant in smooth tramway and a milling plant in smooth working order in the face of storms that have chased each other with persistent regularity only a few hours apart, has been no enviable undertaking, but Mr. Crowther announces that it has been accomplished, and he looks for smooth sailing from now on. The mill is running one shift at present, but during the next few days the second will be added and then Manager Crowther expects to send down the canyon ther expects to send down the canyon to the sampler about one carload of concentrates per day, the product of between seventy-five and 100 tons of crude

During the "limbering up" of the tramway an engine is being made to help the line in motion, but every day's operations makes the line work considerably smoother and, with the weather once settled, the great carrier

the better shape he expects to market an average of one car of concentrates and one car of first-class ore per day, and a little later in the season the ca-pacity of the milling plant, as orig-inally intended, will be increased ma-terially.

## NAILDRIVER WILL SINK.

#### Shaft to Go Down to Level With New York's 800-Foot Mark.

While no official declaration has yet been made of the plan, it is understood that the management of the Naildriver at Park City has about decided to cut loose at that property. For the pur-pose it is said the directors will be shortly called together and that an asessment of anywhere from 3c to 5c per

sessment of anywhere from 3c to 5c per share will be levied.

Recent developments in the New York have left no reason to doubt that all that the Naildriver needs to do is to sink its shaft 300 feet and run a crosscut to open the New York fissure at a depth corresponding with the latter's 800-foot level and get the same character of ore that is now being mined to the west of Naildriver ground.

Manager C. L. Rood stated some time ago that some such plan would most likely be carried out this spring and now that the New York is showing up so well at depth, it is believed the Naildriver company will act speedily.

## TONOPAH-GOLDFIELD SHIPMENT

#### Tonopah Company Sends Out Nearly 1,000 Tons of Ore in a Week.

The ore shipments over the Tonopah railroad last week aggregated 1861 tons, of which sixty-five tons came from Goldfield. The shipments are divided as

From Tonopah—Tonopah company, 950 tons; Tonopah Extension, 245 tons; Montana-Tonopah, 274 tons; Midway, 56 tons; Belmont, 120 tons; Jim Butler, 110 tons From Goldfield-Goldfield Ore Sam-

pling company, 65 tons.
From Lone Mountain—Nevada-Alpine 30 tons; Bacon & Price, It tons.
Broad-gauge ties have been laid to within eighteen miles of Tonopah, and ties are now being received at the rate of 1,000 a day.

## PARK CITY OPERATIONS.

#### Developing in Elkhorn-West Quincy Making 300 Feet a Month.

Park City, April 24.—Pat Traynor is over from his property in Elkhorn district and reports that he and his coowners in the group of claims are giving the ground a thorough developing and expect to report a mine in that district before long. For over two months they have been sinking a shaft and expect that within another month and expect that within anorher month they will cut the ledge, after which time they will drift and develop the country so that they will know whether there is anything to the district or not.

At the J. I. C., or as it is now known, the West Onincy the management is

## PRICES WENT OFF AT THE OPENING

Shorts Were Covering in Wall Street Yesterday.

FEELING OF UNEASINESS DEFALCATION MILWAUKEE HURT THE MARKET.

sional operators sold enough stocks luring the first hour to more than cover contracts with the result of practically repairing the losses. It was evident that bargain hunters were also on hand and their willingness to take stocks at the break was a material factor in rallying the market. The technical situation pointed conclusively to considerable liquidation today. The neavy

C. shaft before the water drove them The importance of the work now under way by that property can not be overestimated as they, by their tunnel, will render it possible for the opening up of a great piece of absolutely un

### TRIAL RUN IS SATISFACTORY.

#### Mill at Abe Lincoln Now Awaits Installation of Holderman Process.

After running its\* mill long enough to demonstrate its ultimate success, the Janet Mining company now operating the Abe Lincoln group of mines, yesterday ceased operations until the several improvements now in course of construction in and about the mill and mine are completed, says the Pioche Record.

the lead concentrates satisfactory and the lead concentrates run well in lead and silver. The gold values however lie in the quartz and escape with the tailings. These run about \$8 per ton and the Holderman process is to be used in cyaniding the tailings, as they leave the mill, which is expected to leave the tailings worth little more than leave the tailings worth little more than

Air drills are to be used in the mine, and a compressor for this purpose is now being installed.

The most serious difficulty experienced is in the water supply. Enough water cannot be secured to run a full tracky hour day shift when the water water cannot be secured to run a full twelve hour day shift when the water is allowed to run in surface ditches to the tailing pit. Although it is pumped back and reused, yet about 70 per cent is lost when it is allowed to run in surface ditches to the tailing pit.

The Holderman process holds the water in tanks and it is estimated that this system will save about 70 per cent of the water supply, and that the mill will be able to run day and night when

will be able to run day and night when

Ore and bullion settlements in this city yesterday, as reported by McCornick & Co., amounted to \$59,900, as follows: Silver, lead, gold and copper ores, \$28,700; base bullion, \$28,900; gold bars, \$2,300.

## Metal Market.

Silver, 57c per ounce. Copper (casting), 14½c per pound. Lead, in ore, \$3.50; New York, \$4.50 per 00 pounds.

## Mining Notes.

Tony Jacobson returned from a trip into Nevada yesterday morning.
W. V. Rice was an interested visitor at the Lower Mammoth on Sunday.

at the Lower Mammoth on Sunday.

The Pioneer sampler yesterday reported three cars of ore from Bingham, one from Alta and one from Nevada.

The Petro company has levied a 5-cent assessment, which will be delinquent on May 22. Sale day is set for June 16.

Ore receipts at the Taylor & Brunton sampler yesterday included thirteen cars from Tintic, seven from Nevada and three from Bingham.

S. M. Levy, manager of the Annie Lau-

S. M. Levy, manager of the Annie Laurie company's mines at Gold Mountain, came up from camp Sunday night to remain several days. The week opens with silver steady at 57 nts per ounce. The local settling basis r copper this week remains the same it was last week, at 14½ cents per ound. The New York quotation on lead given at \$4.50, as against \$4.45 last sek.

week.

Frank M. Benedict returned from month's trip to San Francisco yestermorning. He met a number of the Stake brokers and others who are relocated in the coast metropolis, and of them, so far as he was able to lead the doing well.

Manager George H. Dern of the Communication of the coast metropolis and the sound of the sound

are doing well.

Manager George H., Dern of the C. solidated Mercur was in fro meamp y terday looking after company affairs this end of the line. He says everyth is running smoothly at camp and tha good record for tonnage and gold prod tion is being made this month.

Pioche Record: There are some v fine assays being obtained from mines of the Pioche-Nevada Consolida company at the Point. The work sinking is now being pushed and the in the bottom of the shaft holds its o good and strong. The assays grow bet with depth.

good and strong. The assays grow bet with depth.

"Mike" Comiskey, who formerly op ated on the local mining exchange, who for the past few years has been gaged in business at Butte, is down fr the copper metropolis to look after so o this mining interests here. Before turning north he will go out to Bingha Tintic and Park City.

George E. Blair, who had intended leave for Goldfield Sunday, did not away until last night. He expects to gone some little time, and during his sence he will inspect the Esmeralda P cer company's bohanza and the Red I property as well. Mr. Blair is a direc in each company, and the late repo from the properties have been of such nature that he can hardly wait chance to see for himself what has he pened during the several weeks since was last at camp.

A Salt Laker who inspected the N York Bonanza on Sunday, took some the rock which he brought down whim to the assayer yesterday. He returns of 248.8 ounces silver, 35 per elead and \$1.69 in gold per ton from it. game from the east drift on the 800 ler where, he said, there were fully th feet of it. The west drift, he said, valso looking well and considerable was making in the vein. He said there talking "dollars" per share for stock at the Park.

Meyer & Joseph, Brokers.

A Boston dispatch to a New York financial paper contains the following bit of news concerning the operations of the Daly-West company that will be read with interest here:

"Director Albert Watts of the Daly-west is in receipt of a financial statement of the company for February It shows income of \$\$7,321 and total disbursements of \$\$47,664. Included in this latter amount is \$\$2,500 set aside monthly as insurance and tax reserves but does not include money advanced to the Ontario company. At the present divi-

decline of Thursday last, since which time trading on the exchange has been susperfied, induced a great many calls for additional margins on the brokers and commission bouses. and commission houses.

### Many Selling Orders.

It was known before the market opened that these calls had brought back many responses ordering the selling out of holdings. Speculative sentiment had been so far shaken by last week's development that no effective support was to be anticipated untess at considerable concessions in prices. 'he events of aSiurday's wheat market forced the conclusion that the attempt to corner the May option had been abandoned and the obvious conclusion that heavy speculative losses had been sustained pointed to further liquidation in stocks as a recuperative measure. The pressure centered upon the stocks which have been favorites in the speculation on account of the merger storios. Union Pacific Letters the content of the merger storios. New York. April 24.—A break in the price of stocks today seemed a foregone conclusion. The promise of such a movement was so clear that professional operators soil.

#### Danger Ahead.

the requirements and they devoted a period of the day to covering their short projects in the railroad world in strong contrast to the recent abiding faith in the mutual determination of all the great powers of the railroad world to come together and put into force projects for the common beenfit. Thursday's flurry in the call money market to 7 per cent had served to overthrow to 7 per cent had served to overthrow the conviction that the ease of the meney market was incapable of being disturbed. The bank statement published on Saturday during the interval of the trading showed that loans had continued to expand in spite of the liquidation in stocks. The offering today of \$25,000,000 of New York City bonds made heavy requirements on the money market. Next month the \$100,000,000 Pennsylvania bond subscription, an installment of all but 10 per cent of the Japanese loan and the withdrawal of an installment of government gold deposits are to be provided. The inability of the money market to meet all these requirements is "decidedly less than the period of advance in prices of stocks.

Feeling of Uneasiness. The news of the Milwaukee bank defalcation caused inevitable unsettlement again and gave force to the feeling of uneasiness to the effect of losses in the wheat collapse. The eraction in prices carried Union Pacific to the lowest of the day, and made a broad inroad on the recovery which had been established during the middle portion of the day and made the closing weak. The remarkable rise in the Louisville & Nashville group attracted attention to the published reports of plans for the formation of a great trunk line from north to south by a combination of existing properties. Those stocks relapsed equally with the rest of the The news of the Milwaukee bank deisting properties. Those stocks re-lapsed equally with the rest of the market in the late reaction. ### Treasury Statement.

Washington, April 24.—Today's state ment of the balances in the treasury shows: Available cash balance, \$135,049, 796; gold, \$62,559,071.

### Metal Market.

New York, April 24.—Owing to the con-tinuation of the Easter holidays abroad, there was no London cables today and the local metal market was generally quiet local metal market was generally quiet, but easier.

Copper is more or less unsettled. Leading producers are said to be asking £15.37½s for electrolytic, but it seems pretty well understood that the metal can be bought below that figure.

Lake is quoted at 15.00%15.25; electrolytic at 15.00%15.26, and casting at 14.75% 15.00.

15.00.

Tin. quiet, with the market dull; spot quoted at 3.00@3.50.
Lead, unchanged at 4.50@4.60.
Spelter continues in very quiet demand and shows some weakness. Quotations range from 4.90 to 5.00.
Iron continues quiet. No. 1 foundry northern, 17.40@18.25; No. 2 foundry northern, 17.40@17.55; No. 1 foundry southern and No. 1 foundry southern and No. 1 foundry southern @18.00.

#### Money, Silver and Finance.

New York, April 24.—Close: Money on all, firm, 3@4 per cent; closing bid, 3; iffered, 3¼ per cent.

Time loans, slightly firmed: sixty days, ½ per cent; ninety days, 3½ per cent; ix months, 3½@3½ per cent.

Prime mercantile paper, 4@4½ per ent.

cent.

Sterling exchange, firm, with actual business in bankers' bills at 4.8629@4.8625 for demand and at 4.8440@4.8445 for sixty-day bills.

Posted rates, 4.85 and 4.87.
Commercial bills, 4.84½@4.84½.
Bar silver, 57.

Mexican dollars, 44½.
Government bonds, steady; railroads, irregular.

### LIVESTOCK MARKETS.

## GRAIN AND PROVISIONS.

tively steady. The July option was given support by Armour & Co., and fresh rumors were rife that Gates has associated himself with Armour for a bull campaign in the more distant option. There was also a good general demand, buying being based on the theory that the price of May has reached a level consistent with so-called legitimate conditions. The fact that May wheat in this market was selling at a lower price than at Minne-apolis helped to stimulate demand. Notwithstanding the improved demand, prices made little response, fluctuations in May during the last hour being confined within a cent's range. At the close the May delivery sold at 93, a net loss of 7c. July was down 2c at \$44,084%. Clearances of wheat and flour were equal to 123,000 bushels. The amount on passage, decreased 1.500,000 bushels, and the visible supply decreased 555,000 bushels, compared with 277,000 bushels, and the visible supply decreased 555,000 bushels, compared with 277,000 bushels a year ago. Minneapolis were 477,000 bushels, compared with 277,000 bushels, and the visible supply decreased 355,000 bushels, compared with 277,000 bushels, and the visible supply decreased 355,000 bushels, compared with 277,000 bushels, and the visible supply decreased 355,000 bushels, compared with 277,000 bushels, and the visible supply decreased 355,000 bushels, compared with 277,000 bushels, and the visible supply decreased 355,000 bushels, compared with 277,000 bushels, and the visible supply decreased 355,000 bushels, compared with 277,000 bushels, and the visible supply decreased 355,000 bushels, compared with 277,000 bushels, and the visible supply decreased 355,000 bushels, but 270,000 bushels, and the visible supply decreased 355,000 bushels, compared with 277,000 bushels, and the visible supply decreased 355,000 bushels, but 270,000 bushels, and the visible supply decreased 355,000 bushels, compared with 277,000 bushels, and the visible supply decreased 355,000 bushels, but 270,000 bushels, and the visible supply decreased 355,000 bushels, bu
